

David Marr

AI Mountaineer

Boston, MA | dave.marr@gmail.com | marr.github.io | [marr](#) | [davidmarr](#) | [dmarr](#)

Summary

I enjoy making things work, work well, and repairing them when they don't. Mostly software, but also relationships, bicycles, electronics – anything worth doing right.

Loyal to the craft, hard-working, and considerate, I try to do more with less, and maintain a beginner's curiosity.

Experience

- Dec 2022 – Mar 2026 **Principal Software Engineer / Engineering Lead (UI)**, Context Labs – Cambridge, MA
Led distributed UI/UX engineering organization delivering multi-tenant analytics platform.
- Managed and grew UI/UX team across three continents; introduced OKRs and reviews improving velocity and reducing incident MTTR (time to restore service) by 50%.
 - Drove adoption of AI coding assistants and MCP extensions in our Nuxt stack, pairing hands-on workshops with clear review and testing guardrails so teams shipped safely at higher cadence.
- June 2022 – Dec 2022 **Senior Software Engineer**, Context Labs – Cambridge, MA
- Developed shared UI component library with Vega Lite, MapBox, and accessible controls.
 - Built production BFF platform with GraphQL/Java, multi-tenancy, SSO, RBAC, and internationalization.
- Feb 2020 – Feb 2022 **Lead Engineer**, Filtered.ai – Boston, MA
- Built AI tools to automate organization and grading of technical assessments for custom SaaS/ATS.
 - Implemented fraud and cheat detection using computer vision and AWS Mechanical Turk.
 - Managed full-stack implementation of hiring tools including scheduling, assessing/grading, interviewing, and workflow management.
- Apr 2018 – Dec 2019 **Staff Software Engineer**, Turo – Cambridge, MA
- Owned trip management tools with dynamic pricing, improving host experience and utilization.
 - Shipped UI and workflow updates for the All-star host program to recognize and incentivize top hosts, supporting retention and higher-quality listings.
- Jan 2016 – May 2018 **Senior Software Architect**, OneMarket / Westfield Labs – San Francisco, CA
- Architected physical and online payment products, yielding ~\$2.7m in MRR.
 - Integrated facial recognition, subscription billing, and automated parking gates to produce a smart parking solution.

July 2013 – Dec 2015 **Senior Systems Engineer**, Tilt.com – San Francisco, CA

- Implemented and iterated a simplified contribution flow yielding 15% lift in site signups.
- Pioneered server rendered React using reification with Perl/Dancer backend.

2000-2013 **Previous Leadership & Technical Roles**, Various – Massachusetts & California

- Publishing and ad-tech at Say Media.
- Co-founded an early social product (Secret Feature)
- Design-to-production prototyping (Frog Design)
- Scaled frontend architecture for high-traffic Yahoo properties
- Webby-recognized career advice site (Monster.com)
- Enterprise web integrations (SoftArtisans)
- Industrial automation web interfaces and dashboards (GE Fanuc / Intellution)

Education

Sept 1996 – May 2000 **University of New Hampshire**, BS – Durham, NH
Focus on Management of Information Systems (MIS)

Skills

Languages/Frameworks/Web: TypeScript, JavaScript, Python, Go, React, Vue, HTML, CSS, Tailwind, Nuxt, Tanstack Start, Vega Lite, Mapbox, Maplibre, Deck.gl, D3, Zod, React Hook Form, Vee-Validate, WebGL, WebGPU, WebRTC

AI Tools/Infrastructure: Kubernetes, AWS, PostgreSQL, Docker, Git, MongoDB, Bash, Trino, ArcadeDB, Vite, Vitest, Vercel AI SDK, Pi, Cursor, Opencode, Cloudflare Workers, Cloudflare Durable Objects, Agent Skills, Turborepo, Lerna/NX
